LA FA EL IVAN

RESUM

Donada la comu situacio de trobar-se al carrer amb la necessitat particular d'haver de fer ús d'un lavabo, normalment no sabem cap a on anar i l'opcio de tornar cap casa no sol ser la mes factible.

Per això hem desenvolupat BuddyToilet, una aplicacio per a Android que ens permet cercar els serveis disponibles mes propers. L'aplicatiu es una xarxa social on els usuaris, poden compartir els punts localitzats i fer-ne una valoracio dels mateixos

ABSTRACT

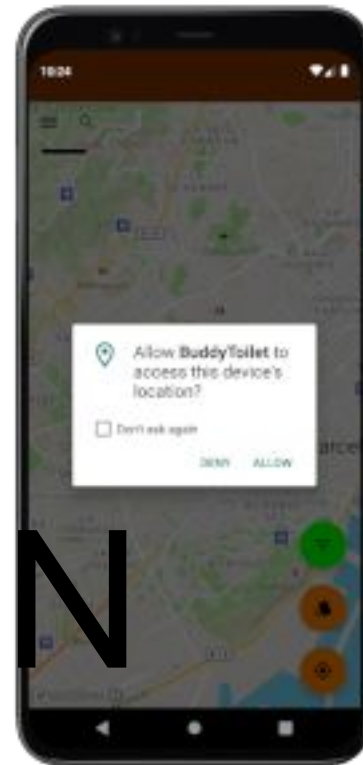

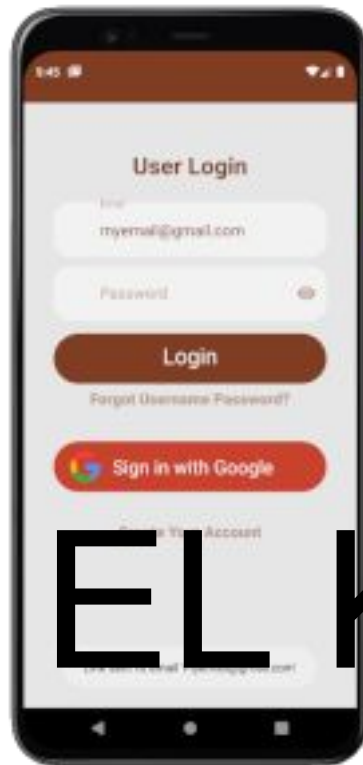

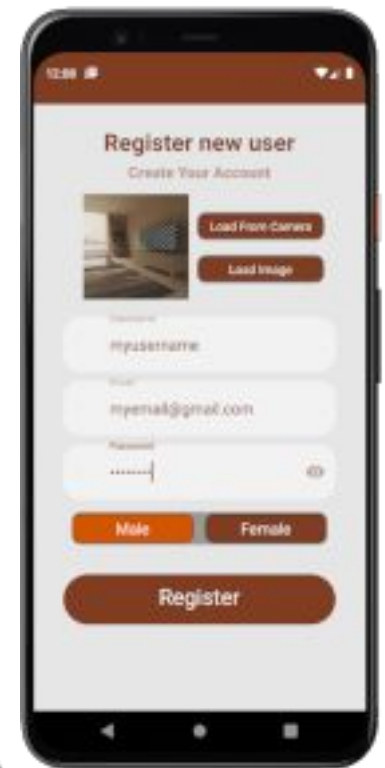

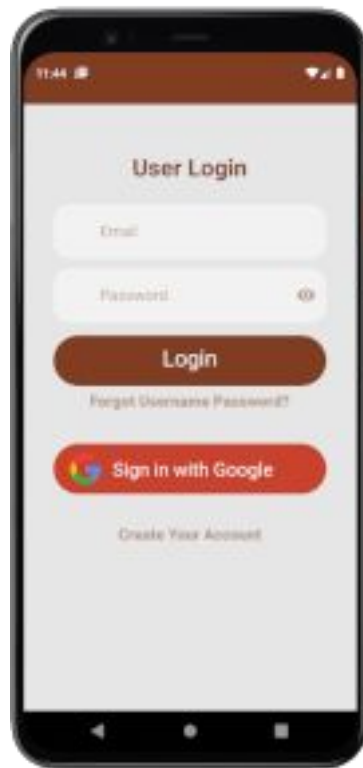

Given the common situation of being on the street with the particular need to use a toilet we don't usually know where to go and the option to return home is usually not the most feasible.

That's why we have developed BuddyToilet, an application for Android that allows us to search for the nearest available services. The application is a social network where users can share the points located and make an assessment of them..
